

Speech, Language, and Hearing Sciences' Pre-Approved Related Courses

In addition to major area courses, the Department requires that students complete twelve credits of 2000 level or above courses taken outside of the Department that are related to the major. These do not have to be from the same department. Ordinarily courses from Allied Health, Anthropology, Human Development and Family Studies, Linguistics, Psychology, Sociology, Education, and Biology are selected for related coursework. The following is a list of pre-approved related courses. They are broken down into twelve categories based on areas of interest. The topical areas are: Biological Development, Cognitive Studies, Health, Psychological Development, Counseling, Research, Language, Communication, Cultural Studies, Gender and Sexuality and Aging. Taking courses from an area of interest does not constitute expert knowledge in that area and will not be signified on the transcript in the way of a concentration or minor.

Other courses may be used to satisfy this requirement with permission of the advisor. Prerequisites have been indicated; however, these are subject to change and students are responsible for checking with the offering department for details.
